Summary

Fullstack Developer · Python · FastAPI · React · AI Integration

I'm a Fullstack Developer focused on **Python**, **FastAPI** and **React**. I enjoy building complete products, from the database to the interface, paying attention to performance and keeping the code maintainable. I work with **AI** in a practical way: I integrate **LLM** models, **streaming** and **agents** into real features, and also use them day to day to ship faster. I collaborate in distributed teams with agile methodologies, **Git**, **GitHub**, **Jira** and **Trello**.

Experience

Frontend Developer, Freelance Project | Architecture Studio – Remote Dec 2025 – Feb 2026

- Institutional platform built with **Next.js** and **Tailwind CSS**, applying **SSR**, **ISR** and **CSR** based on what each page needed.
- AI chat integrated into the site using **Vercel AI SDK** + **Groq** (Llama 3), with real-time streaming and conversational context memory.

Fullstack Developer, Pawtrics Software LLC – Remote May 2023 – Apr 2024

- Fullstack application with **Next.js** and **Supabase** (PostgreSQL + Realtime), with CRUD operations and real-time sync.
- Authentication with **OAuth** and **JWT** reusable components with **Material UI** to maintain visual consistency across the product.
- Team collaboration with **Git** / **GitHub** and task management in **GitHub Projects**.

Education

National Technological University (UTN), Student in University Technician in Programming – San Nicolás, Argentina Mar 2025 – present

Projects

AI Assistant embedded in my portfolio – [View project](#)

- RAG backend built with **FastAPI** (Python) that generates embeddings via **HuggingFace API**, searches by cosine similarity in **pgvector** (Neon DB) and streams responses with **Groq** (Llama 3.3 70B).
- Ingestion pipeline that processes content from **Payload CMS**, generates vectors and stores them for real-time semantic search.
- Deployed with **Docker** on **Azure App Service** frontend integrated in **Next.js** with real-time streaming and automatic language detection.

NachUI – Design System & Component Kit – [View project](#)

- React component kit with a variant system, **i18n** support and tests with **Vitest**.
- REST API in **Nest.js** handling user registration, themes and documentation; consumed by both the **CLI** and the AI agent.
- Agent trained on the documentation with **Vercel AI SDK** + **Gemini** to answer queries in real time.

Skills

Backend: Python, FastAPI, Pydantic, Nest.js, Node.js, TypeScript, REST APIs

Frontend: React, Next.js, Tailwind CSS, Zustand, TanStack Query, tRPC, Material UI

AI / LLMs: Vercel AI SDK, Claude Code, OpenCode, RAG, agents, prompt engineering

DevOps: Docker, Git, GitHub Actions (CI/CD), Vercel, Supabase, monorepos, Fedora Linux

Methodology: Jira, Trello, GitHub, Scrum, code reviews, Git flow, AI-assisted development

Languages: Spanish (native) · Technical English (intermediate)
